

Brijesh Wadhwa

Cybersecurity undergraduate specializing in Threat Intelligence, Blue Team Operations, and Security Automation. Built three Python-based security tools for phishing detection, IOC enrichment, and network reconnaissance. Top 4% globally on TryHackMe with 110+ hands-on cybersecurity labs.

PROJECTS

- Threat Intelligence Platform - [GitHub](#) - [Live Demo](#)

Python — Streamlit — Flask — STIX 2.1 — AbuseIPDB — AlienVault OTX

- Automated IOC collection and enrichment from AbuseIPDB, AlienVault OTX, and RSS using STIX 2.1.
- Integrated GeoIP, WHOIS, and MITRE ATT&CK for contextual threat analysis.
- Built a Streamlit dashboard with CSV, JSON, and STIX export capabilities.

- WhatsApp Phishing Detector - [GitHub](#) - [Live Demo](#)

Python — Streamlit — Flask — Twilio — Hugging Face

- Developed an AI-powered phishing detector using Hugging Face NLP and rule-based analysis for WhatsApp messages and URLs.
- Integrated Twilio WhatsApp API for real-time phishing detection, risk scoring, and user reporting.
- Built a web dashboard for phishing analysis and malicious URL identification.

- Automated Nmap Scanner with GUI - [Github](#)

Python — Tkinter — Nmap

- Developed a Python-Nmap tool for automated host discovery, port scanning, and service enumeration.
- Improved scanning with multithreading, input validation, error handling, and live progress tracking.
- Generated exportable scan reports for vulnerability assessments and security audits.

TRAINING

- Board Infinity

Jun 2025 — Jul 2025

Summer Training — Data Structures & Algorithms

- Completed intensive training in data structures, algorithms, recursion, trees, graphs, sorting, and searching.
- Strengthened problem-solving skills through hands-on coding exercises and assessments.

Achievements:

- Try HackMe

- Ranked among the Top 4% of TryHackMe learners globally, completing 110+ TryHackMe rooms.
- Maintained a 350-day continuous learning streak, demonstrating consistent hands-on cybersecurity practice.

- Leetcode

- Solved 380+ coding problems including Easy, Medium and Hard challenges.
- Earned the prestigious 200 Days Badge 2026 through consistent problem-solving and coding practice.

TECHNICAL SKILLS

CyberSecurity: Threat Intelligence, IOC Analysis & Enrichment, OSINT, Network Security, Web Application Security, Phishing Analysis, Security Automation, Reconnaissance, Defensive Security, Vulnerability Assessment

Security Frameworks & Standards: MITRE ATT&CK, STIX 2.1, TCP/IP

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Shodan, Virus Total

Security Domains: Network Reconnaissance, Port Scanning, Service Enumeration, Intrusion Detection, Privilege Escalation, Active Directory Security

Programming: Python, Bash Scripting, Java (Basics), C (Basics), JavaScript (Basics)

Frameworks & Libraries: Streamlit, Flask, Tkinter, FastAPI, Hugging Face

Cloud & IAM: AWS, AWS Security (Basics), IAM, Cloud Security (Basics)

Databases: MongoDB, MySQL, SQL

Development & DevSecOps: Git, Github, Docker, REST APIs

Web Technologies: HTML, CSS, JS

EDUCATION

Lovely Professional University
(Bachelor of Technology in Computer Science) 2023 - Present (7.14/10)

Govt. Sr. Sec. Smart School
(Class XII) 2021 - 2023 (87.6%)

CERTIFICATIONS

- Introduction to CyberSecurity ([Link](#))
- AWS Security Fundamentals - AWS Training & Certification ([Link](#))
- MongoDB University - 12 Official Skill badges ([Link](#))
- AI For All: AI Appreciate Intel & Digital India ([Link](#))
