Aspiring SOC Analyst — Cybersecurity Enthusiast

Professional Summary

Cybersecurity undergraduate with practical experience in threat intelligence, phishing detection, network reconnaissance, and security automation. Developed security-focused applications using Python, Streamlit, Scapy, Nmap, and STIX 2.1 for threat analysis and monitoring. Ranked among the Top 5% on TryHackMe with 313-day learning streak and hands-on experience across offensive and defensive security labs. Passionate about SOC operations, threat hunting, incident response, and continuous security monitoring.

Technical Skills

Languages: Python, C, Java, JavaScript

Web: HTML, CSS

Frameworks: Streamlit, Flask, Tkinter

Security Tools: Wireshark, Nmap, Burp Suite, Shodan, Git/GitHub

Concepts: STIX 2.1, MITRE ATT&CK, TCP/IP, Threat Intelligence, Linux

Projects

Threat Intelligence Pipeline | *Python — Streamlit — SQLite — STIX 2.1 — Docker*

- Automated threat intelligence collection from AbuseIPDB, AlienVault OTX, and RSS feeds.
- Normalized and enriched IOCs using STIX 2.1, GeoIP, WHOIS, and MITRE ATT&CK.
- Built a Streamlit dashboard with threat analytics and CSV, JSON, and STIX exports.

WhatsApp Phishing Detector | *Python — Streamlit — Flask — Twilio — Hugging Face*

- Developed an AI-powered phishing detector using Hugging Face with rule-based fallback.
- Analyzed URLs, urgency keywords, and forwarding patterns to generate phishing risk scores.
- Integrated a Streamlit web app with a Twilio WhatsApp bot for real-time analysis.

Automated Nmap Scanner with GUI | *Python — Tkinter — Nmap*

- Built a Tkinter GUI to automate Nmap port scanning with real-time scan results.
- Implemented multithreaded scanning and input validation for faster, reliable network analysis.
- Identified open ports, detected running services, and exported scan reports.

Training

Board Infinity – Summer Training (DSA) (Jun 2025 – Jul 2025)

- Completed industry-recognized DSA training covering arrays, trees, graphs, recursion, sorting, and searching algorithms.

Certifications

- **AI For All: AI Appreciate** – Intel & Digital India
- **Master Generative AI and Generative AI Tools** – Udemy
- **Ethical Hacking: Command Injection** – Udemy
- **Computer Programming in C** – iamneo

Achievements

TryHackMe: Ranked #117,949 globally with the 0x9 Mage title. Completed 96 rooms and earned 15 badges, including Top 5% and 313-Day Streak badges. Maintained continuous 313-day learning streak across hands-on labs.

LeetCode: Solved 287+ coding problems (105 Easy, 140 Medium, 42 Hard). Earned prestigious 100 Days Badge 2026 by maintaining a consistent coding streak.

Education

- **Lovely Professional University:** B.Tech Computer Science (2023–Present) | CGPA: 7.14/10
- **Govt. Sr. Sec. Smart School:** Class XII | 87.6%
- **Dr. Asa Nand Arya Model Sr. Sec. School:** Class X | 100%
